

Clean Up

Meriflor N. Gonoy

Action I can commit to in order to influence others to promote the protection of our environment and natural resources is:

- Cleaning our surroundings
 - By taking the initiative to clean our own surroundings, we can inspire others to do the same. Starting with our own houses, we create an environment that encourages others to follow it and practice it to their own homes.
- Taking care of plants
 - During the COVID-19 pandemic, many people have started to buy and care for plants in their homes. By nurturing plants and flowers, we not only beautify our surroundings but also contribute to the well-being of nature. This trend has provided an opportunity for individuals to engage in plant care and promote the importance of environmental protection.
- Organizing surroundings
 - Performing simple tasks like arranging chairs or organizing spaces can also contribute to a cleaner environment. These actions serve as a reminder to others about the significance of maintaining a clean and well-organized environment.
